PROFILE

Programmer with 3+ years experience. I have experience with CSS, Javascript, and React. I like to keep up on new tools and technology by browsing Medium.com, checking r/Frontend subreddit, attending programming Meetups around town and checking out new videos on Youtube and Udemy.

EMPLOYMENT HISTORY

Sep 2021 — Apr 2023

Web Developer, Fervor Creative

Scottsdale

- Work with designers to create websites matching their XD design.
- Implement updates and fixes to current sites in production.
- Made updates and improved upon module system currently in place, along with other developers.
- Worked with git and consistently made backups of our websites.
- Creating, editing, and scheduling HTML email blasts.
- SEO for sites, to include updating YOAST, uploading schema, adding analytics, updating XML, and improving page performance.
- During my time there I built 7 landing pages, 14 full sites, and assisted with builds of 4 other sites.

Jan 2019 — Jan 2021

Software Engineer, Charles Schwab

Phoenix

- Learned to work with the Pega application and make changes to Wire Transfers.
- Made implementation changes to Mutual Fund flow.
- Worked with other departments to pull data form their API to create a new Account Open work flow. Created documentation for the API for better readability and understanding.
- Used Parasoft Virtualize to create sample data to test our Account Open.
- Debugged code using Pega's internal debugger as well as Splunk.

Jul 2017 — Feb 2018

Web Developer, Collective Alternative

Indianapolis

- Worked with account manager, creative director and content team to ensure website fits clients needs, as well as work on SEO and google analytics to optimize site.
- Launched websites and ran maintenance tests as well as Hosting and Domain Migration

EDUCATION

Jan 2017 — Apr 2017

Front End Engineer, The Iron Yard

Indianapolis

- Worked closely with other students to complete daily homework. Paired programming at times. Several group projects.
- Started from the basics of HTML/CSS and worked our way to React/Node.js periodically working with the back-end students (Ruby on Rails) on projects.

Jun 2018 — Sep 2018

Full Stack Engineer, FDMGroup

Reston

- Classes covered SQL, Unix, Java, Sprint, JUnit, as well as a handle of others.
- Worked on a document uploader group project that hit key requirements set by instructor.
